

## LEARNtoken (LEARN) Origins

LEARNtoken is the official currency of **LEARNcollective**, which educates new-comers on blockchain concepts, facilitates the creation of crypto-assets, and celebrates thriving blockchain projects. LEARNcollective was initially conceived by **Crypto Learn Lab** to be a place for both curious new-comers and industry builders with advanced skills.

LEARN quantifies **status** in LEARNcollective by granting access to digital educational resources and private LEARNcollective discussions. LEARNtoken forms the basis of a gamified web3 onboarding & crypto educational experience by rewarding participants with oLEARN for investing time, not money.

The founder of **Crypto Learn Lab**, tlogs.eth, initially deployed LEARN as an ERC-20 token on the Ethereum network. 100m LEARN was minted and equally-distributed to five origin wallets. See the 'LEARNtoken Distribution' section below for additional details on LEARN supply.

**tlogs.eth** is a finance executive with over five years in the blockchain industry and ten years in institutional finance. He is a Certified Bitcoin Professional (CBP), an inactive CPA, and a FINRA Registered Securities Representative (Series 7). He graduated magna cum laude from the University of California, Santa Barbara in 2012 with a BA in Business Economics with an emphasis in Accounting.

## oLEARN Economy

LEARNcollective utilizes MEE6's economy feature to enable **off-chain LEARNtoken (oLEARN)** in the LEARNcollective Discord server. Members can interact with custom codes in the #learn-bazaar channel to earn oLEARN in our play-to-earn economy.

LEARNcollective distributes oLEARN for completing objectives during Core Syllabus courses. Members can spend their oLEARN in #LEARN-bazaar on items such as 10K LEARN Redemptions and LEARNcollective NFTs. Redemptions are currently processed by tlogs.eth for LEARNtoken and NFTs on Ethereum mainnet.

## LEARNtoken Distribution

The maximum supply of **100 million LEARN** was minted upon launch of the LEARNtoken smart contract and split between five addresses as follows. The majority of LEARN rewards are distributed as oLEARN via LEARNcollective's Discord server and must be redeemed for LEARNtoken on Ethereum mainnet.

## **LEARNcollectiveRewards.eth (20m LEARN)**

LEARNcollective has three syllabi: Core, Extended, and Exclusive. Members receive oLEARN for completing objectives during Core Syllabus courses.

The quantities of oLEARN received as rewards for completing Core Syllabus objectives will decrease over time as the 20m LEARN in the LEARNcollectiveRewards.eth wallet is depleted.

## **CORE SYLLABUS \_ RECEIVE oLEARN for participation**

**LEARNcollective initiation\_** Receive oLEARN for completing on-boarding objectives.

- Blockchain & Web3
- Cryptocurrency Wallets
- LEARNcollective Token Exploration (Fungible & NFT)

**Tokenomics\_** Receive oLEARN for finding out why the future may be ‘multi-chain’

- Proof-of-Work (PoW) & Proof-of-Stake (PoS)
- Bitcoin: the first implementation
- Buterin’s Scalability Trilemma

**Decentralized exchange\_** Receive oLEARN for executing on-chain operations

- Transaction Execution
- Decentralized Exchanges (DEXs)
- Automated Market Makers (AMMs)

**Decentralized governance\_** Receive oLEARN for discussing the concept of DAOs

- When is a Decentralized Autonomous Organization (DAO) actually autonomous?
- Overview of Nouns ecosystem (identity, access & sustainable fundraising)
- Other forms of application-specific DAOs
- MakerDAO (MKR)
- Compound Finance (COMP)

## **CryptoLearnLabEvents.eth (20m LEARN)**

The CryptoLearnLabEvents.eth wallet is reserved for in-person events, pop-up mints, metaverse scavenger hunts, and other crypto-specific learning experiences created by CLL to distribute LEARNtoken.

Students are eligible for all event giveaways on top of their student rewards. Vendors in the community interested in contributing their goods or services to a LEARNcollective event may receive LEARN to show our gratitude! Join LEARNcollective Discord to start stacking off-chain LEARNtoken!

### **LEARNcollective.eth (20m LEARN)**

The LEARNcollective.eth wallet is reserved for formation of **LEARNdao**. Collectively, holders of **govLEARN** will vote on proposals for distribution of LEARN from the LEARNcollective wallet.

In the future, Crypto Learn Lab hopes to swap LEARN from the LEARNcollective.eth wallet for stakes in other Web 3.0 communities and projects. Any assets received as swaps will be owned by all LEARN holders.

### **LEARNtokenLiquidity.eth (20m LEARN)**

The liquidity wallet is reserved for responsibly deepening LEARNtoken liquidity on decentralized exchanges. CLL created a LEARN/DAI pairing on Uniswap V3 and supplied the initial liquidity for the pairing utilizing Crypto Learn Lab's DAI and LEARN from the liquidity wallet.

### **CryptoLearnLab.eth (20m LEARN)**

Crypto Learn Lab received 20m LEARN for design and implementation of LEARN tokenomics integrated into LEARNcollective. Additionally, CLL deployed the LEARNtoken smart contract and designed the LEARNcollective token-gated status websites. In the future, LEARN received by Crypto Learn Lab will be utilized to incrementally fund creation of a dApp ecosystem to further the utility of LEARNtoken.

## **Future Development**

### **govLEARN & LEARNdao**

Crypto Learn Lab is currently developing a fork of Compound Finance smart contracts to further the decentralization of LEARNtoken governance. **govLEARN** will be a wrapped version of LEARNtoken with the attributes of Compound Finance's COMP token.

### **nLEARN & sLEARN**

LEARNcollective plans to expose its members to promising web3 protocols and vibrant communities beyond the Ethereum blockchain. Crypto Learn Lab is exploring LEARN bridges to the NEAR & Stacks Protocols. LEARN on NEAR will be referred to as nLEARN and LEARNtoken on STX will be referred to as sLEARN. In the future, oLEARN earned via LEARNcollective Discord will be redeemable for LEARNtoken on the blockchain of your choice, creating a more robust ecosystem.
